React, React Native, NextJS

JavaScript

HTML & CSS

C#/.NET

Java

PHP, Laravel

Git

SQL

Python

C

Computer Networking

Android Development

Languages

Slovak

English (B2)

Profile

My name is Tomas Silny and I am a Software Developer. I have more than 4 years of experience in software development. I am proficient in Web and Mobile development using React, Laravel (PHP), C#/.NET, and SQL databases. I like to design apps, websites, or anything that people can see. I have experience doing commercial apps and websites as a fullstack developer for my customers, or just for fun during my study at university. Except for programming in my free time, I play the piano, ride the bicycle or watch movies or TV shows. I am reliable, I take care of details and I am optimistic. I like to learn new things, especially in IT and software development.

Employment History

Fullstack Developer, Softlogic Software

January 2022 — Present (softlogicsoftware.com, self-employed, my website)

- Development of Web and Mobile apps for customers and companies
- Solved complex problems using the latest technologies such as React, Laravel, and cloud services
